DETAILED ACTION

The Amendments filed 6 September 2005 have been entered in full.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Kosie on 30 January 2006.

The application has been amended as follows:

Please italicize "Clostridium botulinum" in Claims 20 and 35

Please replace the word "said" with "a" in Claim 37 (before "lesion").

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The amendment filed 6 September 2005 is sufficient to overcome the rejections of claims based upon 35 U.S.C §112- first paragraph "Scope of Enablement," "Written description" and Indefiniteness.

Art Unit: 1647

The kit of the Instant Application comprises C3 and fibrin matrix-forming components to be used to facilitate axon sprouting and nerve elongation at a nerve lesion site. It comprises a novel and non-obvious combination of components. The claims of the instant application are directed to components of the matrix-forming kit, including minor variations in components that have been tested experimentally. The claims are free of the prior art as these combinations have not been disclosed or studied in the prior art. The specification provides experimental evidence of utility and enablement under 35 U.S.C. 112, first paragraph. The claims also meet 35 U.S.C. 112- second paragraph requirements because the claims point out and distinctly claim the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
